

Financial Reporting & Analysis

Course Overview

Financial Analysis is a process of selecting, evaluating, and interpreting financial data, along with other pertinent information, in order to formulate an assessment of a company's present and future financial condition and performance to be able to take business decisions towards the success of the firm and increasing the share holder's wealth.

Course Outline

Common-size analysis and the restatement of financial statement information in a standardized form.

- Horizontal common-size analysis.
- Vertical common-size analysis.

Financial ratio analysis and the use of relationships among financial statement accounts to gauge the financial condition and performance of a company.

Financial Ratios can be classified as:

- Activity ratios to measure; the effectiveness in putting asset investment to use.
- Liquidity ratios to measure; the ability to meet short-term, immediate obligations.
- Solvency ratios to measure; the ability to satisfy debt obligations.
- Leverage ratios to measure; the ability to receive a high level of return relative to the amount of fixed cost expended.
- Profitability ratios to measure; the overall effectiveness of management regarding the returns generated on sales and investment.
- Market valuation methods and earnings per share "shareholder ratios" to measure; the firm's financial condition in terms of amounts per share of stock.
